

# Neighbourhood Swap Party

## Woorising, Booragul, Marmong Point

### Sustainable Neighbourhood Group

## Background

The Woodrising, Booragul, Marmong Point Sustainable Neighbourhood Group wanted to reduce consumption and waste in their community.

## How did we do it?

The group decided to host a Neighbourhood Swap Party. Residents were able to bring unwanted items along on the day to swap for other items.

## What we achieved

Together the participants exchanged over 150 items!

The Neighbourhood Swap Party allowed residents to:

- Meet and socialise with their neighbours
- Stop unwanted items going to landfill
- Swap items instead of spending, saving money

This Neighbourhood Swap Party was a fun and easy way to reduce waste and consumption, while also creating new neighbourhood connections.
