

# Renew Lambton Colliery Buildings at Redhead

## Redhead Sustainable Neighbourhood

Group

### Background

The Redhead Sustainable Neighbourhood Group felt it was important to preserve and renew one of their important local historical sites.

### What we achieved

Based on the submissions provided by the group, Lake Macquarie Council was given a grant of \$145,000 to refurbish the site!

Together the group was able to:

- Preserve a historical site
- Sustainably reuse an existing building
- Create partnerships between State Government, Local Government and residents

The group has a number of ideas for the site, which they will be presenting to Council.

### How did we do it?

The group made several submissions to the NSW State Government, asking for the site to be refurbished and preserved. The group also met with Lake Macquarie Council representatives, making connections between residents, community groups and government.

For more information contact the Lake Macquarie Sustainable Neighbourhood Alliance
